Summary

Experienced in leading the design and delivery of end-to-end B2B, B2C, and SaaS products from CMS's to user-facing products for large enterprises like **Mastercard**, **QVC** and **Paramount +**. Comfortable leading single features and full products from discovery to launch, making calls based on real data, and shipping without a large team.

I believe lasting products are built through deep user understanding, alignment with business goals, and thoughtful consideration of technical constraints.

Experience

Senior Product Designer | Axonista

January 2021 - Present

- Designed and shipped features for Ediflo (ediflo.tv), an enterprise video commerce CMS enabling streaming and e-commerce apps with 150,000 yearly users and over 1.3 million streaming plays.
- Led end-to-end design for clients including **QVC**, **Mastercard** and **Pac-12 Networks**, from user research and stakeholder interviews to wireframes, high-fidelity designs, live proto, for Web, iOS, Android, Roku TV and Apple TV.
- Maintained and improved cross-platform design systems built for AI agents to consume, and shipped production code directly using Cursor, Supabase, and Vercel.

Freelance UX/UI Designer

September 2019 - June, 2021

- Visual Design and Style guide creation.
- UX Research: Heat Maps, Benchmarks, User Personas, Customer Journeys and User Testing.

Motion Designer | Electronic Arts

October 2017 - July, 2021

- Responsible for localizing content for global markets in all social Channels (TV, Twitter, YT, etc.)
- Developer of various Automation Workflows and improvements in the QA Roadmap, which speed up the overall production process.
